DAVID ALVARADO SEGURA

Senior Operations & Team Manager | 12 Years | Led 90-Person Delivery Hub | Ex-McKinsey

davidalv@gmail.com | linkedin.com/in/dalvase | Costa Rica

PROFESSIONAL SUMMARY

Operations and people leader with 12 years of experience — nine at McKinsey & Company, where I directed a 90-person Costa Rica service delivery hub through 6 Team Leaders, accountable for service targets (97% of deadlines met, quality failure rate under 5%, utilization 93%+) for Engagement Managers, Directors and Senior Partners. Hired, coached and developed Team Leaders (3 into Team Manager roles, 2 promoted to Senior Team Leader), conducted 100+ interviews and managed performance improvement plans (2 turnarounds, 4 exits). Also led program delivery, KPI and SLA design, process improvement (Lean/Kaizen), and change management (IBM Notes to ServiceNow adoption). At Pivot Finance, ran operations and a small team serving enterprise and individual clients, scaling from ~100 to 300+ clients before hiring. Agile-certified (PSM I, CAL, ICP-ATF), Lean Six Sigma Foundations certified; MBA in progress (expected 2027). Native Spanish, fluent English (C1/C2).

SKILLS

Operations & Service Delivery: Costa Rica Operations Leadership (~90 FTEs), Cross-Hub Collaboration with Poland/India Counterpart Teams, Service Delivery Management, Capacity Planning & Resource Allocation, SLA Governance, Workforce Management, Operational Excellence, SOP Development

Program & Project Management: End-to-End Program Delivery, PMO Coordination, Workplan & Milestone Tracking, Risk & Issue Management, Cross-Functional Stakeholder Alignment, Change Management

Process Excellence: Lean / Kaizen Methodologies, Root Cause Analysis, Workflow Redesign, Waste Elimination, Process Automation, Lean Six Sigma Foundations Certified

Data & Analytics: Power BI (Advanced), Performance Dashboards, KPI Design & Reporting, Data-Driven Decision Making, Executive Reporting

Design & Video Production: Advanced PowerPoint, Adobe Creative Cloud (Photoshop, Illustrator, InDesign — 12+ Years), Figma, Final Cut Pro (Video Editing), Generative AI Design Tools (Veo, Nano Banana, Midjourney)

Tech Stack: Monday.com CRM (Expert), Power BI (Advanced), ServiceNow, JIRA/Confluence, Shopify, Slack, Google Workspace, MS Office Suite, Adobe Creative Cloud (Photoshop, Illustrator, InDesign), Figma, Final Cut Pro

Languages: Spanish (Native), English (Fluent — C1/C2), Italian (Intermediate)

EXPERIENCE

Idols | Self-Employed Side Venture | Jul 2025 – Present
Co-Founder & Operations | *Remote* | *Jul 2025 – Present*

- **End-to-End Storefront Build:** Co-founded a curated reseller business for authenticated sports and entertainment memorabilia (signed jerseys, vinyl records, collectibles in the $250–$3,000 range). Built the Shopify storefront from a base template and applied the Idols brand system to it, customizing functionality beyond the template's defaults using Python — written with AI-assisted guidance as a first hands-on coding project.

Pivot Finance | Co-Owner (50%) | Sep 2023 – Jun 2025
Head of Operations & Business Infrastructure | *Costa Rica* | *Sep 2023 – Jun 2025*

- **Operational Infrastructure & Workflow Automation:** Scaled the business from ~100 to 300+ clients before hiring a team by architecting the operational tech stack from scratch — deploying Monday.com as the central CRM and project tracking hub, with automated workflows for client scheduling, intake, action item tracking, and engagement reporting.
- **Enterprise B2B Account Management:** Managed the full B2B engagement lifecycle for enterprise corporate clients including Moody's, EY, Banco Nacional, Promerica, Belina, and Costa Verde Tours — from requirements gathering and proposal development through delivery oversight, invoicing, account retention, and client satisfaction management.

McKinsey & Company | Global Management Consulting | Jun 2014 – Aug 2023
Team Manager — Visual Graphics & Media (VG&M) | *Costa Rica* | *Jan 2020 – Aug 2023*

- **Global Operations & Service Delivery Leadership:** Directed a 90-person Costa Rica service delivery function — managing end-to-end operations through a layered structure of 6 Team Leaders, each supervising ~15 specialists. Owned capacity planning, resource allocation, SLA governance, and 24/7 delivery continuity, while collaborating closely with counterpart hubs in Poland and India through daily handovers and joint capacity planning.
- **Service-Level Targets & Demanding Internal Clients:** Accountable for holding the function to service targets of 97% of deadlines met, 90% met on the original deadline, a quality failure rate under 5%, utilization at 93% or higher, and 70%

of responses within 30 minutes — serving highly demanding internal clients including Engagement Managers, Directors, and Senior Partners.

- **Team Development & Coaching:** Three direct-report Team Leaders were promoted into Team Manager roles while I coached 6 Team Leaders and 90+ specialists through structured 1:1s, performance reviews, and development planning. Managed 6 PIPs (2 turnarounds, 4 exits). Conducted 100+ structured interviews across multiple role levels. Supported retention by enrolling colleagues in training and individual mentoring when they wanted to grow.
- **Program & Project Management:** Managed multiple concurrent programs of varying scope and complexity — coordinating PMO operations including intake protocols, workplan tracking, milestone management, handover documentation, and cross-functional stakeholder alignment. Adapted approaches to meet the unique requirements of each initiative.
- **Performance Metrics & Executive Reporting:** Maintained and reported on operational KPIs across the function using Power BI dashboards — tracking throughput, quality rates, capacity utilization, and SLA performance. Produced executive-level reports synthesizing complex operational data into clear, audience-appropriate messaging for senior leadership.
- **Change Management & Platform Adoption:** Supported local execution and adoption of the IBM Notes to ServiceNow migration for my teams — managing change readiness, team communications, training coordination, and operational continuity during the transition. Ensured smooth adoption across the Costa Rica hub while coordinating with global IT and operations stakeholders.
- **Agile Delivery of an Internal Skills Tool:** Acted as Scrum Master for an internal initiative raised by two members of my team, who found we had no reliable view of the niche skills our production specialists had. The Ops Manager served as Product Owner and the two colleagues built the product over several sprints; I attended sprint planning, daily scrums, reviews and retrospectives, tracked progress against each sprint goal, and checked increments as they were ready to test. The result was a Microsoft Power Apps tool with a library of specialists, levels and skill sets, which Intake used to assign specialized requests and colleagues used to find who could teach a skill.

Intake Team Leader | *Costa Rica* | *Jan 2018 – Jan 2020*

- **Demand Management & Triage:** Scaled the Workflow Planning team from 7 to 15 specialists after taking over the local Intake function from a temporary lead seconded from McKinsey's Poland hub. Managed intake and scoping for all incoming requests, from standard presentations to specialized media work — assessing complexity, routing each to the right team or production specialist, and translating stakeholder briefs into clear deliverable specifications.
- **KPI Design & Performance Monitoring:** Designed and implemented new team-level KPIs to measure request review speed and assignment turnaround where no measurement framework had previously existed. Delivered data-driven coaching to ensure consistent service excellence and SLA adherence.
- **Daily Stand-Ups as a Process-Improvement Feed:** Applied the daily stand-up portion of agile with the Intake team to review the work completed each day and the challenges that came up, and captured those findings as intelligence for initiatives to improve processes internally and across locations.

Production Team Leader | *Costa Rica* | *Feb 2016 – Jan 2018*

- **Team Leadership & Coaching:** Led a production team of ~15 Business Presentation Designers with day-to-day operational coaching, performance feedback, and strengths-based development. Mid-2017, made a deliberate move from Media to Visual Graphics, recognizing the opportunity to help build a function still finding its footing locally.

Business Presentation Designer | *Costa Rica* | *Jun 2014 – Jan 2016*

- **Executive Presentation Production:** Built high-impact PowerPoint presentations from vague briefs and handwritten notes for global client engagements across McKinsey's practice areas.

Various Architecture Firms | Early Career | 2011 – 2013
Architectural Designer & Team Leader | *Costa Rica* | *2011 – 2013*

EDUCATION & CERTIFICATIONS

- MBA, Finance Emphasis (In Progress) | Universidad Latinoamericana de Ciencia y Tecnología | Oct 2023 – Expected 2027
